

GC3D

The Virtual Plantation

This is my 7th course, my previous creations was :

- Waterworld
- Arsonval
- Bellecombe-Village
- Crystal Ball
- Etherlinks @ Crozon
- Fagen's Forest

Course Statistics :

Time in development : 10 Months

Total Par : 72

Total Length : 6748 m

CRZ File : 125 Mb

Custom Trees : >200 (XFrog Trees)

Verts : 48451

Faces : 95960

2D Objects : 965042

3D Objects : 287

Sounds : 3

Textures : 42

Mappings : 946

A special thanks to REHIT for hosting my beta-test course.

A great thanks to all the Links Corner Forum Members for their help.

To the Beta-Testers : -Really_Rotten

-David Holmes

-Scientist

-Vivo

And finally to André M. my friend who let me discover the XFrog program.

Important Notes :

This is a 125Mo course, I used in this course, 42 textures in 512X512, and added more than 200 custom trees, bushes & grasses in high resolution, approx. 3Mo for each TGA file that's the reason why some of you will have slow rendering times if you have an old computer, but make sure you have the right driver for your video-card, when I started this design, my card was an old GeForce2 and with the right driver my rendering time wasn't unbearable.

Sorry for this problem, but I could not keep these trees for me only. I hope that several designers will use them.

Designers, be careful, if you want to import these trees with APCD, make sure you have enough disk space, and I am not sure that these trees will mix very well with real trees.

Another important note on these trees, when I created them, I designed each tree to be seen in close view, but it is not badly either in other modes.

GC3D is a fictional course based on a top view of a real course in Florida : Lost Key, an Arnold Palmer Design, but I added some modifications.

In this readme file, you will see preview pics and pin positions (18) for each hole

Now, I'm designing a real course 'tropical' with a lot of palm trees as you can see in hole 7 and 13, but please, keep the secret (LOL).

CIAO and enjoy your round
