

HEARTBREAKER

Heartbreaker, is my 8th course released with APCD ; my previous courses are :

- Waterworld
- Arsonval
- Bellecombe
- Crystal Ball
- Etherlinks
- Fagen's Forest
- GC3D

Heartbreaker is created during the Dorado-Beach-East design, it was a test-course, where I test all my textures for Dorado, the mesh is created with the same process as Dorado, I hope to have your comments about bunkers & textures to improve my future Dorado-Beach.

Heartbreaker is not a beta-test-course, but a final release, it's the first time that I share with you one of my test-courses, the reason why is because I think it's a good layout ; I hope it will please you, it's not a perfect design, and you will find some minor errors, but I don't have the time to correct everything

I used for this courses, some 2001 & 2003 trees, with custom grasses some are created by me and others are from other APCD courses (created by Gus Green, I think), the panorama is from 'Xilxer Prairie', thanks to Rick Weathers.

Enjoy your round, François CRISTALLO
