Lakes Barrage GC

an APCD design by Thomas Wagner
2007

Dear Linksters

This is my third attempt to create a golfcourse for Links. »5 Lakes Barrage GC« is an imaginary course in a lakside scenery in the surroundings of a city (I think it is the pano of Calgary). I tried to make the greens mod-friendly as told in the many well-meaning comments to my before done courses.

The par 72 course has a length of 7177 yards (~6425 m).
5 teeboxes and 12 pinpositions at each hole.
Logo, custom pano, splash, hole previews are added.
Also included: several textures and objects (trees, bushes etc.)
I did not plant crowds because of the file size, but dont fear, it renders well and even the shadow-file comes up fast.
Sometimes from a few points of view some strange looking stripes are appearing on the water surface but I hope that does not disturb too much (I did not find a solution to remove them).
Many thanks to all designers which will recognise their textures and objects I used thankful.
So I hope you will have fun and challenge when playing the course.

With best regards
Thomas Wagner
»keep swinging«
